

Overview

Miller Dial is an internationally recognized manufacturer of graphic product identification solutions and user interface components including metal and plastic nameplates, domed labels, decals, graphic overlays, membrane switches, rubber keypads, touchscreens and LCD's. In cooperation with these products, Miller Dial is duly recognized as a leader in cost-effective subassemblies.

Drawing on over 70 years of experience as a pioneer in the identification and user interface field and coupling this with strategic partnerships with PCB manufacturers, plastic injection molders and other highly qualified manufacturers, Miller Dial is able to take your product from concept to completion while removing the cost and complexity of dealing with multiple suppliers.

Selected Product Offerings

Rubber Keypads

Our engineering and design teams can deliver creative insight on emerging technology utilized in rubber keypad manufacturing. We offer all types and configurations of silicone rubber keypads. PCBs, molded enclosures, and a wide variety of connection types available allow us to provide fast turn-a-round complete assemblies.

Name Plates

Whether you are seeking to create an aesthetically-pleasing piece for a premier product, or looking to apply lasting equipment labels to heavy machinery, our talented technicians can create a personalized item to suit your style. This advantage streamlines the manufacturing process and brings value to our clients.

Domed Labels

Domed labels provide a low cost, high quality impression for your brand identity. Dome labels are durable, weather resistant, thick, crystal-clear polyurethane domes over a full-color label. Domed labels can be used in a wide variety of brand identity applications. Logo plates, decorative emblems, pins, wheel inserts, display windows. Order your Domed labels from one of America's oldest manufacturers of brand identification products.

Membrane Switches

Membrane switches often provide the sole interaction between your customers and the technology you provide to them. It is essential that your customers are satisfied with the tactile response of the machine interface. Our expertise in human-machine interaction can supply your application with the ease of use required to compete in an increasingly competitive marketplace.
